- ▶ ***Up To the Hill Meditation:*** Conscious walk in silence through a pine and alcina forest along the coast with views of the sea. Practicing the ancient Japanese technique "Shinrin yoku" (Forest bathing) Practice that induces a relaxation process. We will arrive at a special place where we will do a meditation and a ritual to Mother Earth with the elements. Water, fire, air and earth.
- ▶ ***Vinyasa flow*** practice is more dynamic. It has greater strength: Continuous movement and transitions between postures develop and tone muscles, particularly in the core, arms and legs. The dynamic nature of Vinyasa Flow can elevate heart rate, providing cardiovascular benefits and improving overall heart health. We practice postures (asana), guided meditation and Tibetan singing bowl.
- ▶ ***Full Body Classical Pilates:*** A grounding full-body session rooted in the classical method. We move with mindful breath and precision to strengthen, lengthen, and realign. This class cultivates core connection, postural alignment, and deep resilience. All Pilates sessions are guided by the six Pilates principles – breath, concentration, control, centering, precision and flow – supporting both physical strength and mental clarity.
- ▶ ***Hatha Yoga*** improves strength, flexibility and balance. During classes we practice postures (asana), guided meditation and Tibetan singing bowl.
